Plant Science, 74 (1991) 269—272
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 74 (1991)

Acetolacetate synthase, amino acid, asparagine, glutamine, tryptophan, herbicide resistance, shikimate pathway, gene family, 145
Activity, sugar beet, F_1-ATPase, polypeptide composition, immunodetection, phylogeny, 53
Ac transposable element, transgenic tobacco, transposition tagging strategies, transposition assay, 99
Agrobacterium, CaMV-35S enhancer, *Nicotiana tabacum* L. (transgenic host), *Pisum sativum* L., vicilin gene, 89
Allomyces arbuscula, calpain-like protease, protein phosphorylation, 35
Ambrosia maritima L., molluscicidal properties, Egyptian population, Senegal, *Lymnea natalensis*, *Bulinus forskalii*, *Bulinus globosus*, *Biomphalaria pfeifferi*, 167
Amino acid, asparagine, glutamine, tryptophan, herbicide resistance, acetolacetate synthase, shikimate pathway, gene family, 145
Amino acid catabolism, *Euphorbia lathyris*, seedling, triterpenoid biosynthesis, wax, 193
Antiserum, ATPase, solubilization, corn roots, immunological properties, 157
Arogenate dehydratase, suspension cultures, *Nicotiana silvestris*, aromatic amino acid biosynthesis, enzyme regulation, 229
Aromatic amino acid biosynthesis, suspension cultures, *Nicotiana silvestris*, arogenate dehydratase, enzyme regulation, 229
Asclepias glaucescens H.B.K., cysteinyl proteases, circular dichroism, 7
Asiatic hybrids, *Lilium* species, Oriental hybrids, interspecific hybridization, ovary culture, embryo rescue, in vitro grafted style pollination, 115
Asparagine, amino acid, glutamine, tryptophan, herbicide resistance, acetolacetate synthase, shikimate pathway, gene family, 145
ATPase, solubilization, antiserum, corn roots, immunological properties, 157

Barley, triazole fungicides, membrane permeability, proton extrusion, fusicoccin, red beetroot, 81
Biomphalaria pfeifferi, molluscicidal properties, *Ambrosia maritima* L., Egyptian population, Senegal, *Lymnea natalensis*, *Bulinus forskalii*, *Bulinus globosus*, *Biomphalaria pfeifferi*, 167
Brassica oleracea, embryogenesis, haploid, microspore culture, 235
Bulinus forskalii, molluscicidal properties, *Ambrosia maritima* L., Egyptian population, Senegal, *Lymnea natalensis*, *Bulinus globosus*, *Biomphalaria pfeifferi*, 167
Bulinus globosus, molluscicidal properties, *Ambrosia maritima* L., Egyptian population, Senegal, *Lymnea natalensis*, *Bulinus forskalii*, *Biomphalaria pfeifferi*, 167

Ca^{2+} (cytosolic), homeostasis, membrane potential, microelectrode, *Riccia fluitans*, 27
Callus, metribuzin, tomato, *Lycopersicon esculentum*, tissue culture, cell suspension, *N*-glucosyltransferase, glucoside conjugation, 73
Calpain-like protease, *Allomyces arbuscula*, protein phosphorylation, 35
CaMV-35S enhancer, *Agrobacterium*, *Nicotiana tabacum* L. (transgenic host), *Pisum sativum* L., vicilin gene, 89
Carboxylase/oxygenase, ribulose-1,5-bisphosphate, isoforms, 1
Cell sorting, fusion, somatic hybridization, *Nicotiana*/*Solanum* hybridization, 127
Cell suspension, metribuzin, tomato, *Lycopersicon esculentum*, tissue culture, callus, *N*-glucosyltransferase, glucoside conjugation, 73
Cell suspensions, nucleases, S1 nuclease, mung-bean nuclease, plasmid relaxation, plasmid linearization, 107
Cell wall, *Cicer arietinum*, epicotyls, growth, peroxidase, 171
Cicer arietinum, cell wall, epicotyls, growth, peroxidase, 171
Circular dichroism, cysteinyl proteases, *Asclepias glaucescens* H.B.K., 7
Citrus sinensis, cryopreservation, navel orange, nucellar callus, glycerol, 243
Citrus sinensis, somatic embryogenesis, colchicine, polyploid, cytogenetic instability, in vitro selection, 135
Colchicine, *Citrus sinensis*, somatic embryogenesis, polyploid, cytogenetic instability, in vitro selection, 135
Compositaceae, *Helianthus annuus* L., sunflower, drought, photosynthesis, leaf water potential, regulation, 45
Corn roots, ATPase, solubilization, antiserum, immunological properties, 157
Cryopreservation, *Citrus sinensis*, navel orange, nucellar callus, glycerol, 243
Cysteine proteinases, papain inhibitors, cysteine proteinase inhibitors, inhibitors, trypsin inhibitors, *Vigna unguiculata* seeds, 179
Cysteine proteinase inhibitors, papain inhibitors, inhibitors, trypsin inhibitors, cysteine proteinases, *Vigna unguiculata* seeds, 179
Cysteinyl proteases, *Asclepias glaucescens* H.B.K., circular dichroism, 7
Cytochemistry, plasma membrane, tonoplast, ruthenium red, *Zea mays* L., 221
Cytogenetic instability, *Citrus sinensis*, somatic embryogenesis, colchicine, polyploid, in vitro selection, 135

Drought, *Helianthus annuus* L., compositaceae, sunflower, photosynthesis, leaf water potential, regulation, 45

Egyptian population, molluscicidal properties, *Ambrosia maritima* L., Senegal, *Lymnea natalensis*, *Bulinus forskalii*, *Bulinus globosus*, *Biomphalaria pfeifferi*, 167
Electrophoresis, *Zea mays*, Gramineae, β-glucosidase, isozymes, proteinase, 17
Embryogenesis, *Brassica oleracea*, haploid, microspore culture, 235
Embryo rescue, *Lilium* species, Asiatic hybrids, Oriental hybrids, interspecific hybridization, ovary culture, in vitro grafted style pollination, 115
Enzyme regulation, suspension cultures, *Nicotiana silvestris*, arogenate dehydratase, aromatic amino acid biosynthesis, 229
Epicotyls, cell wall, *Cicer arietinum*, growth, peroxidase, 171
Epicuticular wax, *Euphorbia lathyris*, latex, triterpenols, triterpene ketones, sterols, 185
Euphorbia lathyris, amino acid catabolism, seedling, triterpenoid biosynthesis, wax, 193
Euphorbia lathyris, epicuticular wax, latex, triterpenols, triterpene ketones, sterols, 185

F_1-ATPase, sugar beet, polypeptide composition, immunodetection, activity, phylogeny, 53
Flow cytometry, maize, genome size variation, nucleotypic factors, 255
Fusicoccin, triazole fungicides, membrane permeability, proton extrusion, barley, red beetroot, 81
Fusion, cell sorting, somatic hybridization, *Nicotiana/Solanum* hybridization, 127

Gene family, amino acid, asparagine, glutamine, tryptophan, herbicide resistance, acetolacetate synthase, shikimate pathway, gene family, 145
Genome size variation, maize, flow cytometry, nucleotypic factors, 255
β-Glucosidase, *Zea mays*, Gramineae, isozymes, electrophoresis, proteinase, 17
Glucoside conjugation, metribuzin, tomato, *Lycopersicon esculentum*, tissue culture, callus, cell suspension, *N*-glucosyltransferase, glucoside conjugation, 73
N-Glucosyltransferase, metribuzin, tomato, *Lycopersicon esculentum*, tissue culture, callus, cell suspension, glucoside conjugation, 73
Glutamine, amino acid, asparagine, tryptophan, herbicide resistance, acetolacetate synthase, shikimate pathway, gene family, 145
Glyceollin, soybean, proton conductance, 203
Glycerol, *Citrus sinensis*, cryopreservation, navel orange, nucellar callus, 243
Gramineae, *Zea mays*, β-glucosidase, isozymes, electrophoresis, proteinase, 17
Growth, cell wall, *Cicer arietinum*, epicotyls, peroxidase, 171
Growth factors, invertases, sucrose, sugarcane, 65

Haploid, *Brassica oleracea*, embryogenesis, microspore culture, 235
Helianthus annuus L., compositaceae, sunflower, drought, photosynthesis, leaf water potential, regulation, 45
Herbicide resistance, amino acid, asparagine, glutamine, tryptophan, acetolacetate synthase, shikimate pathway, gene family, 145
Homeostasis, Ca^{2+} (cytosolic), membrane potential, microelectrode, *Riccia fluitans*, 27
Hypersensitivity, uricase, *Nicotiana tabacum*, tobacco mosaic virus, susceptibility, 261

Immunodetection, sugar beet, F_1-ATPase, polypeptide composition, activity, phylogeny, 53
Immunological properties, ATPase, solubilization, antiserum, corn roots, 157
Inhibitors, papain inhibitors, cysteine proteinase inhibitors, trypsin inhibitors, cysteine proteinases, *Vigna unguiculata* seeds, 179
Interspecific hybridization, *Lilium* species, Asiatic hybrids, Oriental hybrids, ovary culture, embryo rescue, in vitro grafted style pollination, 115
Invertases, growth factors, sucrose, sugarcane, 65
In vitro grafted style pollination, *Lilium* species, Asiatic hybrids, Oriental hybrids, interspecific hybridization, ovary culture, embryo rescue, 115
In vitro selection, *Citrus sinensis*, somatic embryogenesis, colchicine, polyploid, cytogenetic instability, 135
Isoforms, ribulose-1,5-bisphosphate, carboxylase/oxygenase, 1
Isozymes, *Zea mays*, Gramineae, β-glucosidase, electrophoresis, proteinase, 17

Latex, epicuticular wax, *Euphorbia lathyris*, triterpenols, triterpene ketones, sterols, 185
Leaf water potential, *Helianthus annuus* L., compositaceae, sunflower, drought, photosynthesis, regulation, 45
Lilium species, Asiatic hybrids, Oriental hybrids, interspecific hybridization, ovary culture, embryo rescue, in vitro grafted style pollination, 115
Lycopersicon esculentum, metribuzin, tomato, tissue culture, callus, cell suspension, *N*-glucosyltransferase, glucoside conjugation, 73
Lymnea natalensis, molluscicidal properties, *Ambrosia maritima* L., Egyptian population, Senegal, *Bulinus forskalii*, *Bulinus globosus*, *Biomphalaria pfeifferi*, 167

Maize, flow cytometry, genome size variation, nucleotypic factors, 255
Membrane permeability, triazole fungicides, proton extrusion, fusicoccin, barley, red beetroot, 81
Membrane potential, Ca^{2+} (cytosolic), homeostasis, microelectrode, *Riccia fluitans*, 27
Metribuzin, tomato, *Lycopersicon esculentum*, tissue culture, callus, cell suspension, *N*-glucosyltransferase, glucoside conjugation, 73
Microelectrode, Ca^{2+} (cytosolic), homeostasis, membrane potential, *Riccia fluitans*, 27

Microspore culture, *Brassica oleracea*, embryogenesis, haploid, 235
Mineral oil overlay, reduced growth, morphogenesis, 249
Molluscicidal properties, *Ambrosia maritima* L., Egyptian population, Senegal, *Lymnea natalensis*, *Bulinus forskalii*, *Bulinus globosus*, *Biomphalaria pfeifferi*, 167
Morphogenesis, reduced growth, mineral oil overlay, 249
Mung-bean nuclease, cell suspensions, nucleases, S1 nuclease, plasmid relaxation, plasmid linearization, 107

Navel orange, *Citrus sinensis*, cryopreservation, nucellar callus, glycerol, 243
Nicotiana/Solanum hybridization, cell sorting, fusion, somatic hybridization, 127
Nicotiana silvestris, suspension cultures, arogenate dehydratase, aromatic amino acid biosynthesis, enzyme regulation, 229
Nicotiana tabacum, uricase, tobacco mosaic virus, susceptibility, hypersensitivity, 261
Nicotiana tabacum L. (transgenic host), *Agrobacterium*, CaMV-35S enhancer, *Pisum sativum* L., vicilin gene, 89
Nucellar callus, *Citrus sinensis*, cryopreservation, navel orange, glycerol, 243
Nucleases, cell suspensions, S1 nuclease, mung-bean nuclease, plasmid relaxation, plasmid linearization, 107
Nucleotypic factors, maize, flow cytometry, genome size variation, 255

Oriental hybrids, *Lilium* species, Asiatic hybrids, interspecific hybridization, ovary culture, embryo rescue, in vitro grafted style pollination, 115
Ovary culture, *Lilium* species, Asiatic hybrids, Oriental hybrids, interspecific hybridization, embryo rescue, in vitro grafted style pollination, 115

Papain inhibitors, cysteine proteinase inhibitors, inhibitors, trypsin inhibitors, cysteine proteinases, *Vigna unguiculata* seeds, 179
Peroxidase, cell wall, *Cicer arietinum*, epicotyls, growth, 171
Photosynthesis, *Helianthus annuus* L., compositaceae, sunflower, drought, leaf water potential, regulation, 45
Phylogeny, sugar beet, F_1-ATPase, polypeptide composition, immunodetection, activity, 53
Pisum sativum L., *Agrobacterium*, CaMV-35S enhancer, *Nicotiana tabacum* L. (transgenic host), vicilin gene, 89
Plasma membrane, tonoplast, cytochemistry, ruthenium red, Zea mays L., 221
Plasma membrane isolation, vesicle sidedness, reorientating sucrose gradient, *Zea mays* L., 213
Plasmid linearization, cell suspensions, nucleases, S1 nuclease, mung-bean nuclease, plasmid relaxation, 107
Plasmid relaxation, cell suspensions, nucleases, S1 nuclease, mung-bean nuclease, plasmid linearization, 107
Polypeptide composition, sugar beet, F_1-ATPase, immunodetection, activity, phylogeny, 53
Polyploid, *Citrus sinensis*, somatic embryogenesis, colchicine, cytogenetic instability, in vitro selection, 135
Proteinase, *Zea mays*, Gramineae, β-glucosidase, isozymes, electrophoresis, 17
Protein phosphorylation, *Allomyces arbuscula*, calpain-like protease, 35
Proton conductance, glyceollin, soybean, 203
Proton extrusion, triazole fungicides, membrane permeability, fusicoccin, barley, red beetroot, 81

Reduced growth, morphogenesis, mineral oil overlay, 249
Red beetroot, triazole fungicides, membrane permeability, proton extrusion, fusicoccin, barley, 81
Regulation, *Helianthus annuus* L., compositaceae, sunflower, drought, photosynthesis, leaf water potential, 45
Reorientating sucrose gradient, plasma membrane isolation, vesicle sidedness, *Zea mays* L., 213
Ribulose-1,5-bisphosphate, carboxylase/oxygenase, isoforms, 1
Riccia fluitans, Ca^{2+} (cytosolic), homeostasis, membrane potential, microelectrode, 27
Ruthenium red, plasma membrane, tonoplast, cytochemistry, *Zea mays* L., 221

S1 nuclease, cell suspensions, nucleases, mung-bean nuclease, plasmid relaxation, plasmid linearization, 107
Seedling, amino acid catabolism, *Euphorbia lathyris*, triterpenoid biosynthesis, wax, 193
Senegal, molluscicidal properties, *Ambrosia maritima* L., Egyptian population, *Lymnea natalensis*, *Bulinus forskalii*, *Bulinus globosus*, *Biomphalaria pfeifferi*, 167
Shikimate pathway, amino acid, asparagine, glutamine, tryptophan, herbicide resistance, acetolacetate synthase, gene family, 145
Solubilization, ATPase, antiserum, corn roots, immunological properties, 157
Somatic embryogenesis, *Citrus sinensis*, colchicine, polyploid, cytogenetic instability, in vitro selection, 135
Somatic hybridization, cell sorting, fusion, *Nicotiana/Solanum* hybridization, 127
Soybean, glyceollin, proton conductance, 203
Sterols, epicuticular wax, *Euphorbia lathyris*, latex, triterpenols, triterpene ketones, 185
Sucrose, invertases, growth factors, sugarcane, 65
Sugarcane, invertases, growth factors, sucrose, 65
Sugar beet, F_1-ATPase, polypeptide composition, immunodetection, activity, phylogeny, 53
Sunflower, *Helianthus annuus* L., compositaceae, drought, photosynthesis, leaf water potential, regulation, 45
Susceptibility, uricase, *Nicotiana tabacum*, tobacco mosaic virus, hypersensitivity, 261
Suspension cultures, *Nicotiana silvestris*, arogenate dehydratase, aromatic amino acid biosynthesis, enzyme regulation, 229

Tissue culture, metribuzin, tomato, *Lycopersicon esculentum*, callus, cell suspension, *N*-glucosyltransferase, glucoside conjugation, 73
Tobacco mosaic virus, uricase, *Nicotiana tabacum*, susceptibility, hypersensitivity, 261
Tomato, metribuzin, *Lycopersicon esculentum*, tissue culture, callus, cell suspension, *N*-glucosyltransferase, glucoside conjugation, 73

Tonoplast, plasma membrane, cytochemistry, ruthenium red, Zea mays L., 221
Transgenic tobacco, Ac transposable element, transposition tagging strategies, transposition assay, 99
Transposition assay, Ac transposable element, transgenic tobacco, transposition tagging strategies, 99
Transposition tagging strategies, Ac transposable element, transgenic tobacco, transposition assay, 99
Triazole fungicides, membrane permeability, proton extrusion, fusicoccin, barley, red beetroot, 81
Triterpene ketones, epicuticular wax, *Euphorbia lathyris*, latex, triterpenols, sterols, 185
Triterpenoid biosynthesis, amino acid catabolism, *Euphorbia lathyris*, seedling, wax, 193
Triterpenols, epicuticular wax, *Euphorbia lathyris*, latex, triterpene ketones, sterols, 185
Trypsin inhibitors, papain inhibitors, cysteine proteinase inhibitors, inhibitors, cysteine proteinases, *Vigna unguiculata* seeds, 179
Tryptophan, amino acid, asparagine, glutamine, herbicide resistance, acetolacetate synthase, shikimate pathway, gene family, 145
Uricase, *Nicotiana tabacum*, tobacco mosaic virus, susceptibility, hypersensitivity, 261

Vesicle sidedness, plasma membrane isolation, reorientating sucrose gradient, *Zea mays* L., 213
Vicilin gene, *Agrobacterium*, CaMV-35S enhancer, *Nicotiana tabacum* L. (transgenic host), *Pisum sativum* L., 89
Vigna unguiculata seeds, papain inhibitors, cysteine proteinase inhibitors, inhibitors, trypsin inhibitors, cysteine proteinases, 179

Wax, amino acid catabolism, *Euphorbia lathyris*, seedling, triterpenoid biosynthesis, 193

Zea mays, Gramineae, β-glucosidase, isozymes, electrophoresis, proteinase, 17
Zea mays L., plasma membrane, tonoplast, cytochemistry, ruthenium red, 221
Zea mays L., plasma membrane isolation, vesicle sidedness, reorientating sucrose gradient, 213
